

AI Automation Tools Comparison

A breakdown of popular automation platforms and when to use each one.

Make.com

- Best for: visual, no-code workflow automation
- Strengths: large library of app integrations, easy to learn
- Good for: connecting apps like Gmail, Sheets, Shopify, Slack

n8n

- Best for: developers who want more control and self-hosting
- Strengths: open-source, customizable with code nodes
- Good for: complex workflows, privacy-conscious teams

Zapier

- Best for: absolute beginners, simple 2-3 step automations
- Strengths: huge app directory, very simple interface
- Trade-off: gets expensive fast at higher usage volumes

Claude / GPT-based Agents

- Best for: automations that need reasoning or decision-making
- Strengths: can read, summarize, and respond intelligently
- Good for: customer support bots, content generation, triage

Choosing the Right Tool

- Simple 2-step automation → Zapier
- Complex multi-branch workflow → Make.com or n8n
- Need self-hosting/full control → n8n
- Need the automation to 'think' → add an AI agent step
